The purpose of the ICW Product Bulletin is to share interesting solutions using ICW products. Watch for new bulletins by issue number and date. Past issues are available on our website: www.icwusa.com/product-bulletins/

Overhead Short Arm vs. Standard Overhead Arm

Overhead Short Arm (UL182I-OHATS) on a wall channel.

Standard Overhead Arm (UL182I-OHAT) on a wall track inside a cabinet.

Standard Overhead Arm (UL182I-OHAP) on a wall plate.

The overhead "boom" arm is one of the most popular mounts that we offer at ICWUSA.com, Inc.

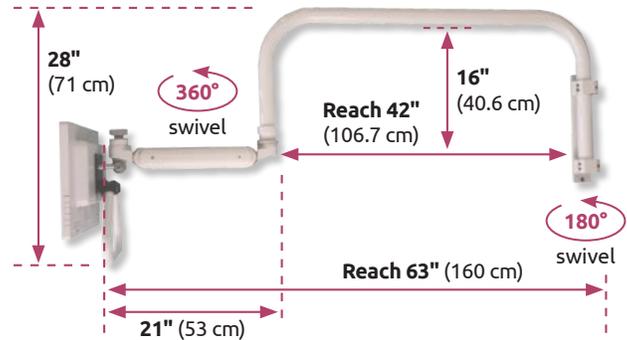

The standard overhead arm, which was released several years ago, reaches 56 1/2" and can extend as far as 77 1/2" with our UL182 mount attached to the end. By request, we've recently released a shorter version of the overhead arm called the overhead short arm. This mount measures 42" and can extend as far as 63" with the UL182 attached.

The overhead short arm is great for small operatories and small spaces where the longer reach is not required.

For more information, contact your friendly ICW product specialist by emailing sales@icwusa.com or calling 1-800-558-4435.
